

LITE KEG MINI

Designed for freshness: Compact 10-liter volume helps preserve beverage integrity even in slow rotation scenarios.

Built for versatility: Available in 304, 316, and duplex stainless steel – ready for everything from NOLO to highly corrosive beverages like water.

Incredibly lightweight: Polypropylene chimes reduce total weight, improving handling and transport efficiency.

Ergonomic: Designed with a comfortable grip and fully stackable geometry to optimize space.

FULL OF FRESHNESS, FREE FROM CORROSION

IDEAL FOR LOW ROTATION, PREMIUM, AND CORROSIVE BEVERAGES

The 10L LITE KEG MINI from THIELMANN is designed for brewers who are as serious about quality as we are. Its compact **10-liter size** means lower headspace and faster consumption cycles, keeping your beverages fresh and tasting as intended.

The LITE MINI features a lightweight polypropylene chime and a robust stainless steel body, **available in 304, 316, and duplex stainless steel**. The 304 version is perfect for low or no-alcohol drinks, where freshness and rotation vary, while the 316 option steps up corrosion resistance for more demanding formulas.

Or, for maximum resistance, choose the duplex stainless steel variant. **Duplex steel offers industry-leading corrosion resistance and strength**, making it a smart choice for beverage producers focused on purity, shelf stability, and long-term performance. It's even tough enough to handle water or other highly corrosive beverages, a segment where most containers fall short.

The keg's surfaces are meticulously pickled and passivated, meeting stringent food-grade standards to ensure it's ready to deliver your beverages in pristine condition. Plus, its ergonomic grip and stackable geometry make the LITE KEG MINI the ultimate space-saving and easy-handling keg. For the finishing touch, we also offer customization options, such as colored chimes.

Get exceptional THIELMANN quality, engineered with expertise you can trust – now more resilient, and even lighter, and **ideal for premium or sensitive applications**.

APPLICATIONS

NOLO (NO-LOW ALCOHOL) BEVERAGES

The LITE KEG MINI is the perfect partner for the expanding NOLO beverage category. Its compact 10-liter size helps keep flavors fresh, even if the product is sold at a slower rate than its alcoholic counterparts.

FRESH AND SHORT SHELF LIFE PRODUCTS

The LITE MINI's small volume ensures that sensitive products like craft soda, cold brew coffee, or specialty juices retain their intended taste and effervescence for extended periods, guaranteeing a high-quality beverage, pour after pour.

WATER AND HIGHLY CORROSIVE BEVERAGES

The duplex steel LITE MINI is a dependable, hygienic solution for water and other highly corrosive beverages. With outstanding corrosion resistance, duplex is the intelligent choice for demanding liquids like pure water or functional beverages with acidic or other aggressive ingredients.

MODEL	BODY MATERIAL	DIAMETER	WEIGHT
LITE KEG MINI 10L	304 Stainless Steel	239 mm	2.4 kg
LITE KEG MINI 10L	316 Stainless Steel	239 mm	2.4 kg
LITE KEG MINI 10L	Duplex Stainless Steel	239 mm	2.1 kg

WHY THIELMANN?

- **A RELIABLE AND COMPETENT PARTNER.** Customer expectations are always our priority, which is why we foster a close collaboration with each and every client, adapting our service to their needs.
- **THE SOLUTION FOR EVERY BEVERAGE.** Thanks to our deep understanding of complex industry requirements, we are able to manufacture high-quality, fully customized container solutions.
- **SUSTAINABLE IN EVERY SENSE.** A company that's environmentally sustainable is economically sustainable. THIELMANN consistently invests in sustainability to be greener, leaner, and better run.
- **AT YOUR SERVICE ALL OVER THE WORLD.** With a global presence and solid network, THIELMANN expertise is never far from where you are.
